

IN THE CLAIMS:

LISTING OF CURRENT CLAIMS

1. (Original) A cleaning apparatus for a pillared device, comprising:
an outer tank, further including thereof opposing sidewalls respective upper edges, said upper edges further having respective openings to allow a shaft extending out from two ends of said pillared device to pass through;
5 an inner tank within said outer tank for containing said pillared device, supported upon a floor of said outer tank, at least enabling a portion of said pillared device to be immersed into a first cleaning solution contained in said inner tank;
a lid covering onto a top of said outer tank; and
a plurality of nozzles constructed in an interior of said lid to spray a second
10 cleaning solution onto said pillared device.

2. (Original) The cleaning apparatus of claim 1, wherein said pillared device is a roller.

3. (Original) The cleaning apparatus of claim 1, wherein said inner tank is a semi-cylindrical shell.

4. (Original) The cleaning apparatus of claim 3, wherein two ends of said semi-cylindrical shell are mounted to said opposing sidewalls of said outer tank.

5. (Original) The cleaning apparatus of claim 1, wherein said first cleaning solution is a diluted potassium peroxide solution.

6. (Original) The cleaning apparatus of claim 1, wherein said second cleaning solution is a de-ionized water.

7. (Original) The cleaning apparatus of claim 1, wherein said pillared device is an optoelectrical device.
